

Learn how to storyboard the flow of your lessons

This 1-day course establishes design best practices amongst your project teams. It introduces the benefits of storyboarding, and the importance of having common writing standards through the development process. Over the course of the day, you will learn how to plan the sequence of your lessons, and how to use the storyboard template to document the key steps and actions. Participants will walk away with the tools and templates to assist their planning and development.

“initial scepticism disappeared once a real example was viewed and the importance of the storyboard realised”

You will learn about

- The value of a storyboard
- Lesson design & review process
- The elements & structure of the storyboard template
- Using the template to plan effective lesson sequences
- The importance of common writing standards

Course topics

- Introducing storyboards
- The storyboard template
- Defining common writing standards
- Practical storyboarding

Who should attend

This course is targeted at new users of Assima's simulation training technology who want to know how to plan and document the structure of their lesson. It is also beneficial for team leaders and project managers who need to implement best design practice and common standards in the development of all content.

Course details

Duration: 1 day

Type: Classroom

Prerequisites: None

Benefits of attending

Skill your teams in efficient elearning design practices and arm them with the tools and templates to plan their lessons and deliver effective simulation training content.
