VIMAGO ADMINISTRATOR

Learn how to set up Assima's Collaborative Platform for your organisation

This virtual course provides essential learning for system administrators to configure Assima's cloud-based platform Vimago for their organisation.

This course is designed around a typical ERP system implementation scenario in which you will set up the Vimago platform from start to finish. It combines thought-provoking brainstorms and hands-on activities that will take you through all the required stages to get Vimago ready for your organisation. Through the use of our virtual training labs, you will be able to practise your skills in a live online learning environment, with personal help and guidance from our certified online learning instructors.
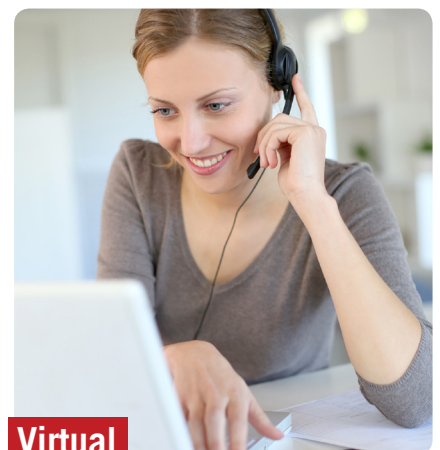

YOU WILL LEARN ABOUT

- Vimago server settings
- Creating and maintaining roles & users
- Assigning Licences to users & roles
- Defining platform folder structures
- Granting permission on content & roles
- Customising content displays
- Reviewing error and history logs

COURSE TOPICS
