

VIMAGO ASSIST AUTHOR - SAP

Learn how to create Vimago Assist content for SAP R/3 applications using Assima's collaborative content authoring platform

This course provides essential learning for Vimago users who will author and deploy Vimago Assist content for SAP R/3 applications. Following a typical SAP implementation scenario, participants will create, advance and publish the full array of Assist content types using storyboards and multiple resources provided. Over two days, participants will build their skills with hands-on Vimago practicals, on a live SAP training environment, with help and guidance from our expert instructors.

YOU WILL LEARN ABOUT

- Vimago Assist features
- Setting up Vimago Assist projects
- Authoring Assist content in-application
- Advancing and managing Assist content
- Deploying Assist content to targeted SAP users
- Reporting on Assist usage & content adoption

COURSE TOPICS

- A tour of Vimago Assist
- Setting up my Assist project
- In-application notes
- In-application guides
- Piloting Assist from your Workspace
- Assist reporting
- Comprehensive study

WHO SHOULD ATTEND

This course is suitable for Vimago users who will design Assist content in SAP R/3, with a Vimago Assist Author licence.
