

VIMAGO ASSIST AUTHOR - WEB

Learn how to create Vimago Assist content for web applications using Assima's collaborative content authoring platform

This course provides essential learning for Vimago users who will author and deploy Vimago Assist content for web applications. Following a typical system implementation scenario, participants will create, advance and publish the full array of Assist content types using storyboards and multiple resources provided. Through the use of our virtual training labs, participants access a live training environment, and can practise their skills with personal help and guidance from our certified virtual instructors.

YOU WILL LEARN ABOUT

- Vimago Assist features
- Setting up Vimago Assist projects
- Authoring Assist content in-application
- Advancing and managing Assist content
- Deploying Assist content to targeted end users
- Reporting on Assist usage & content adoption

COURSE TOPICS

- A tour of Vimago Assist
- Setting up my Assist project
- In-application notes
- In-application guides
- Piloting Assist from your Workspace
- Assist reporting
- Comprehensive study

Virtual
